Student Organization Event Registration & Attendance System

Basic web application for managing student organization events, member registration, attendance check-in, certificate eligibility, and participation reports.

PROJECT DESCRIPTION

This project is a basic web-based event registration and attendance system for student organizations. It allows officers to create and publish events, members to register online, and organizers to record attendance during the event. The system can also track certificate eligibility and generate participation reports for post-event evaluation. It is suitable for a 3-5 member student group because it includes common real-world workflows such as login, member master records, event setup, registration transactions, attendance check-in, and reporting.

FUNCTION LIST

Project	Module	Screen Type	Function Name	Detailed Function Description	Suggested Owner
Student Organization Event Registration & Attendance System	Authentication	Login	User Login	Allows organization officers, members, and administrators to sign in securely using email or student number and password.	Member 1
Student Organization Event Registration & Attendance System	Authentication	Login	Role-Based Access	Controls access so officers can manage events, members can register and view attendance, and administrators can maintain system-wide records.	Member 1
Student Organization Event Registration & Attendance System	Authentication	Login	Account Registration Approval	Lets students submit an account request and allows officers or administrators to approve valid organization members before account activation.	Member 1
Student Organization Event Registration & Attendance System	Master Data	Master	Organization Member Management	Maintains member records including student number, full name, course/year, section, contact details, membership type, and active/inactive status.	Member 2
Student Organization Event Registration & Attendance System	Master Data	Master	Event Type Management	Creates standard event classifications such as seminar, outreach, meeting, competition, general assembly, or training.	Member 2

Student Organization Event Registration & Attendance System	Master Data	Master	Venue Management	Maintains venue records with room name, capacity, location, availability notes, and contact person for event coordination.	Member 2
Student Organization Event Registration & Attendance System	Transactions	Transaction	Event Creation and Posting	Allows officers to create an event with title, type, venue, schedule, participant limit, description, and registration deadline, then publish it to members.	Member 3
Student Organization Event Registration & Attendance System	Transactions	Transaction	Online Event Registration	Allows members to register for an event, validates capacity limits and deadlines, and stores the registration status as pending, confirmed, waitlisted, or cancelled.	Member 3
Student Organization Event Registration & Attendance System	Transactions	Transaction	Attendance Check-In	Records attendance through manual search, QR code entry, or student number input and timestamps each participant check-in.	Member 4
Student Organization Event Registration & Attendance System	Transactions	Transaction	Certificate Eligibility Tracking	Marks participants as eligible for certificates based on attendance, event completion, or officer approval.	Member 4
Student Organization Event Registration & Attendance System	Reports	Transaction	Event Participation Report	Shows participants per event, attendance rate, no-show list, and course/year distribution for officer evaluation.	Member 5
Student Organization Event Registration & Attendance System	Administration	Master	Officer and Permission Management	Allows the administrator to assign officer roles, set permission levels, deactivate accounts, and review user activity logs.	Member 5
